Amada Laser Cutting
Machine LC 2415
Alpha III 4kw Overview
The versatile LC Alpha
III is designed to meet
the demands of both
high volume and small
batch production of
sheet metal
components'*

**'Laser Cutter AMADA
AMERICA**

**October 15th, 2018 -
The LCG 3015 is the
latest addition to
AMADA s CO 2 line
of laser machines**

**The LCG was
developed after
listening to the voice
of our customers
who wanted a low
cost laser machine
to meet their budget
but refused to
compromise on cut
quality machine
accuracy and overall
expandability'**

**'4 ways to a better
laser cut edge The
Fabricator**

**April 1st, 2015 - The
fiber laser has**

proven itself to be the next generation of laser cutting for the industry With its lower maintenance cost simplicity of operation and capability to cut at much higher speeds than the CO 2 laser the fiber laser is the fastest growing option for many new laser purchases'

'Laser technology SMF Engineering October 19th, 2018 - The fourth generation of Amada?s successful ALPHA series is still the market leading hybrid laser cutter The new HS 2003 laser cutting head ensures a perfect cut The cutting head among other things dependent on the cutting conditions the material the type of workpiece its pretreatment the panel size and the position in the work'

High Speed Thin Metal Cutting using Fiber Laser Technology October 12th, 2018 - contrast nitrogen

cools the cut requiring more laser power but offering increased cut quality and oxide free edges specifically for stainless steels with increasing thickness Figure 2 shows examples of products cut using this technology"The Next Generation in Reliability LCG 3015 Servosteel

October 14th, 2018 - The LCG 3015 is the latest addition to Amada's CO 2 line of laser machines The LCG was developed after listening to the voice of our customers who wanted a low cost laser machine to meet their budget but refused to compromise on cut quality machine accuracy and overall expandability Amada took these requests' 'Laser Cutting Machine Safety Guide AMADA

October 18th, 2018 - Laser cutting is a machining process that forcibly removes the material by using

the reaction of oxidation with a laser heat source and by using an assist gas With the laser cutting of mild steel a laser beam is delivered by mirrors and a fiber to the cutting'

'Amada Laser Cutting Laser Lens Optics

October 11th, 2018 - A new benchmark in price performance fibre laser cutting Laser Cutting A new benchmark in price performance fibre laser cutting 2 Combined with an Amada designed oscillator a worldwide laser machine pioneer exotic materials with ease The perfect balance of low energy usage and high speed productivity Amada introduces the new direct drive fibre laser cutting machine the LCG 3015AJ

'CNC LASER MACHINE Used AMADA

October 18th, 2018 - CNC LASER MACHINE AMNC F PROGRAMMING MANUAL PREFACE

This manual describes the programming procedures for the laser machine To increase the cutting efficiency of the laser machine read the manual carefully before creating programs For operating the laser machine refer to the separate Operator's Manual Printed in Japan Programming'

Amada Miyachi

September 28th, 2018

- Laser cutting is a non contact process which utilizes a laser to cut materials for industrial applications resulting in high quality

dimensionally accurate cuts The process

works by directing the laser beam through a co axial gas nozzle to the workpiece'

'Cutting 250 alu on an Amada pulsar 2415 nt

October 18th, 2018 -
