## **Torsion constant**

### **Wikipedia**

May 7th, 2018 - The torsion constant is a geometrical property of a bar's cross section which is involved in the relationship between angle of twist and applied torque along the axis of the bar for a homogeneous linear elastic bar.

Allowable stress If a calculated maximum stress of a member for the expected service conditions is less than a certain value and if this certain value has a proper margin against failure stress then this value is called allowable stress' 'Mech Engg
