s immune system and
produce a more severe
reaction that could be**

life threatening In most cases allergies are hereditary and are a lifelong condition We now offer the IgG Blood Allergy Test Intolerances An intolerance is the bo'

'Food Allergy or Intolerance Allergy amp Anaphylaxis Australia April 20th, 2020 - Many people think they are allergic to a food when in fact they are

intolerant Unlike food allergies intolerances do not involve the body's immune system Slower in onset and not life threatening food intolerance symptoms include headaches bloating wind nausea mouth ulcers or hives Symptoms that occur several hours after a food is eaten are more often as a result of an intolerance or "Allergies Symptoms Causes and

Medication Health

May 3rd, 2020 - Allergies are when your immune system reacts

abnormally to a substance Find out more about the most types of allergies

symptoms and treatments" Allergens and Allergic Reactions HowStuffWorks

May 3rd, 2020 - Allergic reactions rarely occur during the first encounter with the

troublesome allergen because the body needs time to accumulate the antibodies Also an individual s sensitivity to certain allergens seems to be related to a family history of allergies People who have a tendency to develop allergies are referred to as

atopic" *What is Allergy*

April 20th, 2020 - Allergies are increasing in Australia and New Zealand and

affect around one in five people There are many causes of allergy and symptoms vary from mild to potentially life threatening Allergy is one of the major factors associated with the cause and persistence of asthma" **Food Allergies and Intolerances**

Eatright

May 1st, 2020 - Food allergies occur when your body s immune system reacts to a substance in a

food usually a protein your body sees as harmful This sets off a chain reaction within your body

Symptoms can occur within minutes and can be mild such as a runny nose or itchy eyes to severe and can even be life threatening"

Who Has Allergies ACAAI Public Website

May 4th, 2020 - The sooner you can identify potential allergies in your child the better

mon allergy symptoms for children include sneezing coughing an upset stomach a skin rash and difficulty breathing Learn more about mon triggers such as animal dander grass or tree pollen insect stings nuts milk and eggs'

'Overview of the Most mon Drug Allergies May 3rd, 2020 - Skin rashes are the most mon symptoms of

**adverse drug reactions
Urticaria and
angioedema hives and
