alumni we have one
mission roasting brewing
and serving uniquely
smooth high grade coffees
and refreshments that are
simply out of this world'

**'what is the moon made of
chemical position**

June 3rd, 2020 - the
earth s moon is similar
to the earth in that it
has a crust mantle and
core the position of the
two bodies is similar
which is part of why
scientists think the moon
may have formed from a
large meteor impact

breaking off a piece of
the earth while it was
still forming'

'moon

June 3rd, 2020 - the moon
is an astronomical body
orbiting earth as its
only natural satellite it
is the fifth largest
satellite in the solar
system and by far the
largest among planetary
satellites relative to
the size of the planet
that it orbits its
primary the moon is after
jupiter s satellite io
the second densest
satellite in the solar
system among those whose
densities are
known' '*clawhammer supply
