'Tutorial 2 Indian Institute of Technology Madras
October 3rd, 2018 - Instead of the MMSE decision
feedback equalizer DFE with 2 feedforward coefficients a_0 and a_1 and a single feedback coefficient b_1 Use again
? 0''Adaptive equalizer Wikipedia

October 12th, 2018 - An adaptive equalizer is an
equalizer that automatically adapts to time varying
properties of the communication channel A well known
example is the decision feedback equalizer a filter
that uses feedback of detected symbols in addition to
conventional equalization of future symbols'
