May 15th, 2020 - twelve linear intravertebral vacuums associated with vertebral pression deformities were visible in 11 patients from t8 to l2 four at t12 and four at l1 of the 12 linear intravertebral vacuums seven 58 were seen by the initial interpreting radiologist the mean age of these patients was 76 6 years the female male ratio was 10 1"log or linear pots for tone the gear page

May 21st, 2020 - what the audio pots can do that linears can t is give that quick overdrive cleanup when you drop from the 10 to 7 range then gradual volume change in the middle and a smoother roll off fade in at the bottom i actually prefer linear volume though i know i m in the minority here"esp a better volume control

May 27th, 2020 - 1 better volume control the volume control in a hi fi amp or preamp or any other audio device for that matter is a truly simple concept right wrong in order to get a smooth increase in level the potentiometer pot must be logarithmic to match the non linear characteristics of our hearing a linear pot used for volume is quite"gain vs volume knowing the difference could change your mix

May 25th, 2020 - rms is the average level of the audio whereas fs is the exact moment to moment level of the audio so you d want to use rms normalization instead however if you try to normalize your tracks to 0db rms those tracks will distort since many of the audio s peaks will be above the 0db threshold'
