'2018 flow and transport in permeable media conference grc

June 2nd, 2020 - this grc will be held in conjunction with the flow and transport in permeable media grs gordon research seminar grs those interested in attending both meetings must submit an application for the grs in addition to an application for the grc refer to the associated grs program page for more information'

'a prehensive review of pore scale modeling

June 3rd, 2020 - pore scale modeling as an alternative approach to lab measurement firstly serves as an effective bridge to link the pore scale properties pore geometry and wettability and displacement mechanisms to continuous scale multiphase flow in porous media and secondly allows us to determine essential flow functions such as capillary pressure and relative permeability curves which are required'

'multiphase flow in porous media p m adler springer

May 21st, 2020 - the study of multiphase flow through porous media is undergoing intense development mostly due to the recent introduction of new methods after the profound changes induced by percolation in the eighties attention is nowadays focused on the pore scale the physical situation is plex and'
